

NOTICE

No sharps

Examples of sharps include:

- **Needles** – hollow needles used to inject drugs (medication) under the skin
 - **Syringes** – devices used to inject medication into or withdraw fluid from the body
 - **Lancets**, also called “fingerstick” devices – instruments with a short, two-edged blade used to get drops of blood for testing. Lancets are commonly used in the treatment of diabetes.
 - **Auto Injectors**, including epinephrine and insulin pens – syringes pre-filled with fluid medication designed to be self-injected into the body
 - **Infusion sets** – tubing systems with a needle used to deliver drugs to the body.
- Connection needles/sets** – needles that connect to a tube used to transfer fluids in and out of the body. This is generally used for patients on home hemodialysis.

What to Do with Used Sharps

Accepts Sharps for Disposal.
